

MAKING MONEY FROM SUSTAINABLE CHARCOAL

Presenter

Eng.Fahima Tindamanyire

Secretary: The Sustainable Charcoal and Briquette Producers Union Tanzania (**SCABPU**)

Huge need and opportunity for investment in charcoal production in Tanzania

Tanzania one of the highest charcoal consumers in world

- 2 million tonnes of charcoal used per year and demand rising
- 50% used in capital Dar es Salaam
- Annual deforestation of 400,000+ hectares per year (charcoal + other factors)

Massive amounts of waste biomass in value chain

Sustainable Charcoal and Briquettes

Produced from sustainable forestry plantations and forestry waste

High levels of community interest

Rural communities keen to increase revenue streams from wood waste

New technologies improving production speed & quality

Modified Oil Drum

- High quality charcoal
- Efficient production
- Cheap local alternative to the heavy and expensive Hookway retort

Significant export potential

Just 12 Countries in Europe, Asia, US and South Africa import more than 50% of global charcoal

European Countries trust FSC certification

Presenter

Mr. Anyelwisyeh Mahenge

Chairperson: The Sustainable Charcoal and Briquette Producers Union Tanzania (**SCABPU**)

Challenges and way forward in charcoal production in Tanzania

THANK YOU!
